Hello! I'm new here. I found this forum from EymenWinnerYT's youtube channel. very cool channel it is. I have registered to this forum for very simple reason and that's to know about DontKnow2023. I really don't like him, I had a beef on his discord and on Betaworld, near Azalea Town or something stupid like that. I only know few people who also knows DontKnow2023, so I decided to ask here. If you happen to know his friends or their contacts, I'd like to know them as well. Thanks in advance.

i talked a lot lmao

Hes just rude. One example is he tried to make multiple people on a Minecraft server hate certain players.

Hes just rude. One example is he tried to make multiple people on a Minecraft server hate certain players.

He also sent a racist picture about me and bullied me with racist words on discord at begin of 2024 even tho he sent me a virus that he made. Because of this my parents almost took away my computers  
But after some months he repaired my town on betaworld which is grieved so i forgived him

There are also alot of bad players on betaworld. Some of them did weird things on betaworld discord by using my name and caused everyone to hate me. This happened on summer 2024

Now i don't use discord because it is banned in my country.
